

QUEST INSTITUTE PRESENTS NEW FRONTIERS IN DENTAL IMPLANTOLOGY FOR DENTISTS.

14TH APRIL 2021 6.30PM-8.30PM

Are you a General Dental Practitioner who would like an update on how Implant dentistry has changed? The UK has experienced continued, steady growth in the uptake of dental Implant treatment. Even if you do not place Dental Implants it may be worthwhile knowing what is happening in this area of dentistry and what opportunities are available to contribute to a patient of yours who might enquire about or opt for Implant rehabilitation. There is also a duty of care to prevent peri-implantitis as many of your patients may have already had implant rehabilitation.

Join us for an information packed evening free of charge.

Aims and Objectives:

Obtain an update on dental Implantology illustrated by a mix of routine cases.

Explore if further instruction in well-established principles & practice of Implant dentistry might compliment your skillset.

Understand how Implant dentistry has evolved into a remarkably predictable treatment modality.

Outcomes:

Knowledge of the fundamental principles which underpin contemporary Implant dentistry.

GDC Development outcomes- C&D

Verifiable CPD - 2 hours.
